.. Greeting ..

To My Friends and Customers:

I am now entering my 30th year as a Nurseryman and fruit grower on the Texas Coast. Being located at Sinton for the past sixteen years, and previously in Galveston county. During this time I have tested out almost all known trees and plants, in any way suited to this climate and a great many which were recommended as adapted I have found worthless. In this price list. I am giving space only to such as I can recommend from actual experience.

It has been and will continue to be my policy to sell and recommend only such trees or plants as will give my customer reasonable results.

The result of my long experience is yours for the asking.

CITRUS FRUITS.

Grown on C. T. and Sour Orange stock.

Wherever the C. T. stock will thrive, we recommend this as it imparts a flavor unequalled by any other stock. Also it is conducive to cold resistance.

Care in selection of varieties as to ripening period is very essential. Late ripening varieties must be avoided, as risk of losing the crop by cold is too great.
